

YOUR TURN

For Exercises 1 and 2, determine whether the relationship between the two quantities shown in each table are proportional by graphing on the coordinate plane.

1.

Temperature (Degrees)	
Celsius	Fahrenheit
0	32
5	41
10	50
15	59
20	68

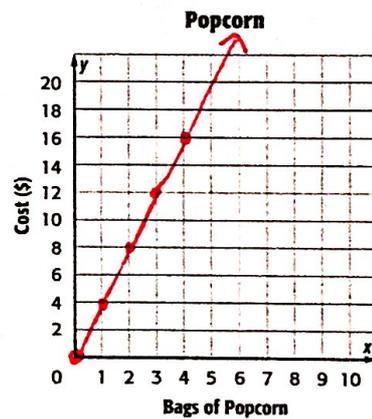

Nonproportional (does not pass through the origin (0,0)).

2.

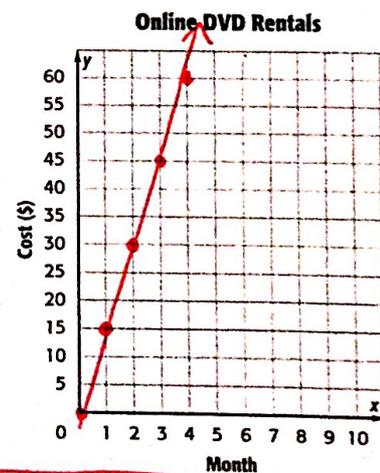

Popcorn	
Bags of Popcorn	Cost (\$)
0	0
1	4
2	8
3	12
4	16

Proportional

3. An online DVD rental company charges \$15 a month for unlimited rentals. Determine whether the total paid after each month is proportional to number of months by graphing on the coordinate plane. (Make a table first)

# of months	Cost (\$)
1	\$ 15
2	\$ 30
3	\$ 45
4	\$ 60

proportional

$$\frac{15}{1} = \frac{30}{2} = \frac{45}{3} = \frac{60}{4} = \$15 \text{ per month}$$

$$0 \text{ months} = \$0 \quad (0,0)$$
